

# WHICH SIDE SHOULD YOUR HORSES LIVE ON?

## Polylast™ SurfaceGuard with Microban® Antimicrobial Technology

The world, especially where horses live, is covered with microbes. Polylast™ SurfaceGuard with Microban® Antimicrobial Technology (Polylast™) can greatly reduce the possibility of unwanted microbes in your stalls, aisles, wash racks, and horse trailers. Horses are more comfortable and your facilities are cleaner, quieter, odor resistant and microbe-resistant.

On an unprotected surface, bacteria can double in number every 20 minutes. Polylast™ is a patented and proprietary non-slip surface made from 100% recycled rubber combined with U.S. primers, binders and finishes. During the manufacturing process, Polylast™ is infused with Microban® Antimicrobial technology to help prevent the growth of damaging microorganisms on your horses surfaces.

Visit [www.PolylastSystems.com](http://www.PolylastSystems.com) then contact Polylast™ to find your nearest dealer.
