

Save Time & Money

Polylast™ is a permanent surface that is bonded to the floor. Since there aren't any mats to pull, clean, and replace, time can be saved on cleaning and maintenance. On an unprotected surface, bacteria can double in number every 20 minutes. Microban® Antimicrobial Technology is infused into Polylast™ during the manufacturing process to help prevent the growth of damaging bacteria, as well as inhibit stains and odors caused by bacteria.

Not only is a Polylast™ floor extremely durable, it is comfortable, and provides the best slip-resistant surface available. Polylast™ flooring absorbs 40%-50% of the impact shock on one's feet, helping to prevent injury and fatigue. When working on a Polylast™ floor, there is no need for employees to wear special non-slip footwear. Instead, they can comfortably and confidently walk with less fear of slips and falls.

Finally, Polylast™ is a non-porous product, which means it is completely impervious to liquids both on the surface and from below. A wide variety of colors are available.
