Polylast SurfaceGuard™ with Microban® Antimicrobial Can Contribute to Obtaining LEED® Credits

Introduction

Polylast SurfaceGuard™ with Microban® Antimicrobial Surface Solutions is a **100% recycled** crumb rubber flooring system that is seamless, durable, slip-resistant, easy-to-clean, antimicrobial, and provides the necessary comfort and safety to help protect humans and animals from dangerous slip-and-falls.

What is LEED?

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices. To receive **LEED** certification, building projects satisfy prerequisites and earn points to achieve different levels of certification.

The Benefits of LEED

In addition to the obvious environmental benefits, certification proves to the market that the building is efficient and incorporates responsible building practices. Green buildings have also been proven to be more economically efficient as a result of the following factors:

- Increased health and safety benefits of employees, students, customers, and the like.
- Increased employee productivity, and lower turnover and absenteeism
- Increased sales in retail establishments
- Reduced operating costs
- Increased building evaluation and return on investment

LEED contributions

LEED MR Credit 2.1-2.2 (1-2 points)

LEED MR Credit 4.1-4.2 (1-2 points)

LEED MR Credit 5.1-5.2 (1-2 points)

LEED EQ Credit 4.1-4.2 (1-2 points)

LEED SS Credit 7.1-7.2 (1-2 points)

Note: LEED standards change and should be checked for recent updates.
