

Polylast SurfaceGuard™ with Microban® Antimicrobial is recognized as a sole source.

Sole source procurement is any contract entered into without a competitive process, based on a justification that only one known source exists and only one single supplier can fulfill the requirements.

Polylast Systems, LLC has a patented process (US #8,389,624 B2) of combining proprietary primers, binders, and rubber that has allowed Polylast specialty flooring systems to endure as no other surface has. Polylast SurfaceGuard™ with Microban® Antimicrobial was developed for livestock use, so you can be sure its strength and durability have been tested and proven, in both the laboratory, and in the field.

There are currently no other surfaces, or flooring, on the market today, that are “equal to” Polylast SurfaceGuard™ with Microban® Antimicrobial.

In addition to the patented process, Polylast Systems maintains an exclusive flooring system agreement with Microban® International, the global leader in antimicrobial product protection. Polylast SurfaceGuard™ with Microban® Antimicrobial is guaranteed to inhibit the growth of damaging microorganisms, while fighting the proliferation of pathogens, that humans and animals can encounter daily.

Polylast specialty flooring systems help prevent bacteria, mold and mildew, while reducing odors and stains, and help keep surfaces cleaner longer between washings.

Polylast specialty flooring systems have been used in many extreme duty facilities such as WestWorld, City of Scottsdale, St. Lucie County Fairgrounds, Teton County Fairgrounds, Colorado State University, Purdue University, New York City Mounted Police, Oklahoma State University, USDA National Animal Disease Center, and hundreds of other public and private facilities.

Polylast SurfaceGuard™ with Microban® Antimicrobial specialty flooring system has been specified as a sole source at The Ohio State University, Cal Poly San Luis Obispo - Oppenheimer Family Equine Center, University of Oklahoma – Gaylord Family Oklahoma Memorial Stadium, Grady County Fairgrounds, Oklahoma State Fairgrounds, and many others.

Here are a few reasons why there are no other products “equal to” Polylast:

- Polylast is the only company capable of producing this product
- Polylast maintains an exclusive flooring system agreement with Microban® International
- Microban® Antimicrobial product protection lasts the life of the surface, guaranteed
- Patented process of encapsulating rubber during the manufacturing process
- Reduces livestock leg impact concussion and shock by 40-50%, (ASTM D2240)
- Vehicles and heavy equipment are driven on Polylast surfaces daily without damage
- Designed specifically for livestock comfort, safety and enhanced performance
- 10-Year Warranty, under the weight of livestock, large animals, and heavy machinery

MULTI-PURPOSE RECYCLED RUBBERIZED FLOORING
